

Managing In-Flight Emergencies

In this FREE presentation by the Sporty's Academy instructional team, you'll learn the best possible strategies to deal with an in-flight emergency – vacuum and electrical problems, engine failures, smoke in the cockpit and also loss of control in flight. Loss of control in flight is implicated in 51% of all fatal personal and business use GA accidents. Understanding the principles of stalls, coordination and angle of attack is paramount to prevention. Learn what the emergency checklists don't tell you and how to prepare for surprises and what you can do to prevent an emergency.

Directions: Take I-275 to exit 63B (Eastgate). Go East on S.R. 32 for approximately 3 miles. Follow signs to Clermont County Airport. Seminar held on 2nd floor of Sporty's building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
